### SR3000™ is "Self-Adhesive" Re-defined

**Description/Application:** A revolutionary concept in self-stick resist films, SR3000™ is NOT a "self-adhesive" product. SR3000™ is a repositionable self-stick film that will cling to polished surfaces such as glass, granite, marble, ceramic and the like. 3 mil is designed specifically for ultra-fine high resolution designs useful for half-tone imaging. Carvers desiring to achieve a deeper etch or multi-stage carving will be thrilled with the results of 5 mil. SR3000™

**Exposure Time:** 25 seconds.

**Development:** Standard washout times begin at 45-90 seconds, depending on the mil.

**Durability:** SR3000™ has unmatched blast resilient properties superior to any photo resist in the industry.

**Mils:** SR3000™ is available in 3, 4 & 5 mil thicknesses.

**Requirements:** To use SR3000™ photo resist film, you will need a UV light source, film tool, pressurized washout tool. Our Wire Wheel Brush is highly recommended for fine line text and detail.

**Material Chosen and Why:** SR3000™ photo resist film satisfies all needs for a self-stick film without the problems "self-adhesive" brands can bring. SR3000™ renders beautiful half-tone imaging and ultra high resolution images. SR3000™ saves time and money by enabling you to produce a superior product with less hassle.
