

# AUTOMATED WASHOUT SYSTEMS

Spin-Processing Units Patent #5,366,584

## 1428 Standard Washout System

**The Affordable Alternative**

Built for the moderate level user, this patented Automated Film Washout System will allow for processing up to 25 sheets of photo-resist film per day. This unit will offer the immediate process improvement in the efficiency and consistency in your production of SR2000™ / SR3000™ photo-resist films.

**Features:** 5 high impact-washing nozzles (*For precision developing*), a 15-gallon water storage tank with internal heating element (*hot water source and direct drain required*), timer controlled washout cycles with an easy to use multifunctional panel switch, and an auxiliary hand sprayer with pump.

**Sheet Size:** Allows up to a 14" x 28" or two sheets at 14" x 10"

**Dimensions:** 20L" x 30W" x 55H"

**Weight:** 180lbs. (unit on rolling casters)

**Power Recommend:** Dedicated 110volt / 20 amp circuit

**\$4,500**

**\$6,995**

## 1650 Production Washout System

**Expanding Excellence**

Built for the Intermediate to high end user, this patented Automated Film Washout System will allow for processing up to 200ft of photo-resist film per month. This unit will offer the immediate process improvement in the efficiency and consistency in your production of SR2000™ / SR3000™ photo-resist films.

**Features:** 10 high impact-washing nozzles (*For precision developing*), a 20-gallon water storage tank with internal heating element (*hot water source and direct drain required*), Timer controlled washout cycles with an easy to use multifunctional panel switch, and an auxiliary hand sprayer with pump.

**Features: Sheet Size:** Allows up to a 14" x 50" or four sheets at 14" x 10"

**Dimensions:** 34L" x 35W" x 63H"

**Weight:** 300lbs. (unit on rolling casters)

**Power Recommend:** Dedicated 220volt single phase / 20 amp circuit
